What guidance do the Common Core State Standards provide to teachers?

The Common Core State Standards are a clear set of shared goals and expectations for the knowledge and skills students need in English language arts and mathematics at each grade level so they can be prepared to succeed in college, career, and life. The standards establish what students need to learn, but they do not dictate how teachers should teach. Teachers will devise their own lesson plans and curriculum, and tailor their instruction to the individual needs of the students in their classrooms.

Common Core State Standards versus previous state education standards

The Common Core was developed by building on the best state standards in the United States, examining the expectations of other high-performing countries around the world, and carefully studying the research and literature available on what students need to know and be able to do in order to be successful in college, career, and life.

No state was asked to lower their expectations for students in adopting the Common Core. The evidence-based standards were developed in consultation with teachers and parents from across the country, so they are also realistic and practical for the classroom.

How do the Common Core State Standards impact teachers?

The standards impact teachers by:

- Providing consistent goals and benchmarks to ensure students are progressing on a path for success in college, career, and life
- Providing consistent expectations for students who move into their districts and classrooms from other states
- Providing the opportunity to collaborate with teachers across the country as they develop curricula, materials, and assessments linked to high-quality standards
- Helping colleges and professional development programs better prepare teachers.

Do the standards tell teachers what to teach?

Teachers know best about what works in the classroom. That is why these standards establish what students need to learn, but do not dictate how teachers should teach. Instead, schools and teachers decide how best to help students reach the standards.

What does this work mean for students with disabilities and English language learners?

The Common Core State Standards give states the opportunity to share experiences and best practices, which can lead to an improved ability to serve young people with disabilities and English language learners. Additionally, the standards include information on application for these groups of students.

Application to Students with Disabilities

The Common Core State Standards articulate rigorous grade-level expectations in the areas of mathematics and English language arts. These standards identify the knowledge and skills students need in order to be successful in college and careers.

Students with disabilities —students eligible under the Individuals with Disabilities Education Act (IDEA)—must be challenged to excel within the general curriculum and be prepared for success in their post-school lives, including college and/or careers.

These common standards provide an historic opportunity to improve access to rigorous academic content standards for students with disabilities. The continued development of understanding about research-based instructional practices and a focus on their effective implementation will help improve access to mathematics and English language arts (ELA) standards for all students, including those with disabilities.

Students with disabilities are a heterogeneous group with one common characteristic: the presence of disabling conditions that significantly hinder their abilities to benefit from general education (IDEA 34 CFR §300.39, 2004). Therefore, how these high standards are taught and assessed is of the utmost importance in reaching this diverse group of students.

In order for students with disabilities to meet high academic standards and to fully demonstrate their conceptual and procedural knowledge and skills in mathematics, reading, writing, speaking and listening (English language arts), their instruction must incorporate supports and accommodations, including:

- Supports and related services designed to meet the unique needs of these students and that enable their access to the general education curriculum (IDEA 34 CFR §300.34, 2004).
- An Individualized Education Program (IEP)¹, that includes annual goals, aligned with and chosen to facilitate their attainment of grade-level academic standards.
- Teachers and specialized instructional support personnel who are prepared and qualified to deliver high-quality, evidence-based, individualized instruction and support services.

Promoting a culture of high expectations for all students is a fundamental goal of the Common Core State Standards. In order to participate with success in the general curriculum, students with disabilities, as appropriate, may be provided with additional supports and services, such as:

- Instructional supports for learning based on the principles of Universal Design for Learning (UDL)², which foster student engagement by presenting information in multiple ways and allowing for diverse avenues of action and expression.
- Instructional accommodations (Thompson, Morse, Sharpe & Hall, 2005) are changes in materials or procedures that do not change the standards but allow students to learn within the framework of the Common Core.
- Assistive technology devices and services to ensure access to the general education curriculum and the Common Core State Standards.

¹ According to IDEA, an IEP includes appropriate accommodations that are necessary to measure the individual achievement and functional performance of a child.

Some students with the most significant cognitive disabilities will require substantial supports and accommodations to have meaningful access to certain standards in both instruction and assessment, based on their communication and academic needs. These supports and accommodations should ensure that students receive access to multiple means of learning and opportunities to demonstrate knowledge, but retain the rigor and high expectations of the Common Core State Standards.

² UDL is defined as “a scientifically valid framework for guiding educational practice that (a) provides flexibility in the ways information is presented, in the ways students respond or demonstrate knowledge and skills, and in the ways students are engaged; and (b) reduces barriers in instruction, provides appropriate accommodations, supports, and challenges, and maintains high achievement expectations for all students, including students with disabilities and students who are limited English proficient.” Excerpt from the Higher Education Opportunity Act (PL 110-135).

COMMON CORE ALIGNED LESSON PLAN TEMPLATE

Subject(s): _____ Grade: _____

Teacher(s): _____ School: _____

LESSON ELEMENT	
1. Common Core Learning Standard(s) Addressed:	STUDENT-FRIENDLY TRANSLATION (#2,3,4 only)
2. Learning Target(s): (What will students know & be able to do as a result of this lesson?)	
3. Relevance/Rationale: (Why are the outcomes of this lesson important in the real world? Why are these outcomes essential for future learning?)	
4. Formative Assessment Criteria for Success: (How will you & your students know if they have successfully met the outcomes? What specific criteria will be met in a successful product/process? What does success on this lesson's outcomes look like?)	
5. Activities/Tasks: (What learning experiences will students engage in? How will you use these learning experiences or their student products as formative assessment opportunities?)	

6. Resources/Materials: (What texts, digital resources, & materials will be used in this lesson?)

7. Access for All: (How will you ensure that all students have access to and are able to engage appropriately in this lesson? Consider all aspects of student diversity.)

8. Modifications/Accommodations: (What curriculum modifications and/or classroom accommodations will you make for Students with Disabilities in your class? Be as specific as possible.)

Common Core Aligned Lesson: Reflection

- Does this lesson reflect one of the “shifts” in instruction? If so, please describe which shift is addressed and how?
- In addition, please choose ONE question below to respond to after you have taught the lesson OR create your own question and respond to it after you have taught the lesson.
 1. How did this lesson support 21st Century Skills?
 2. How did this lesson reflect academic rigor?
 3. How did this lesson cognitively engage students?
 4. How did this lesson engage students in collaborative learning and enhance their collaborative learning skills?

You are also encouraged to use a facilitated “Learning from Student Work” protocol to review and reflect on student work related to this lesson.
